Re: NPDES Permit No. AKG-31-5002
Trading Bay Production Facility July 2010 Discharge Monitoring Reports (DMR)

Dear Mr. Park:

Union Oil Company of California operates the Trading Bay Production Facility that discharges regulated effluents in Cook Inlet, Alaska under NPDES Permit No. AKG-31-5002. Pursuant to condition VI.B of the Permit, Union Oil Company of California is hereby submitting the July 2010 NPDES Discharge Monitoring Reports (DMRs) for the Trading Bay Production Facility.

The format of the attached July DMRs is essentially the same as the format of the DMRs we submitted in June, except for the items that your Data Steward has agreed to exclude on his July 16 email. The pages eliminated were all discharge forms for Granite Point Tank Farm and Trading Bay Production Facility that are not required by the permit and all the non-aqueous based drilling fluids (NAF) forms for all 12 facilities. We are using the forms provided by EPA for all other discharge reporting. These forms still contain a number of errors that have not been resolved. Consequently, we have revised the forms to accommodate the reporting that is required by the permit. Your Data Steward in the compliance and enforcement department is aware of the errors, and our revisions to accommodate the errors. We are awaiting further guidance from them on EPA's preferred path forward and the preferred forms for future DMRs to be submitted by Union.

Using the new forms, the DMRs for our 12 facilities still contain nearly 250 pages. Signing each page to certify the DMRs is a substantial administrative burden. Ms. Hahn Shaw telephonically approved Union submitting this letter as certification of all the attached DMRs, in place of endorsing each of the attached DMRs. Thus, the certification below applies to all of the DMRs attached to this letter.

Mr. Chae Park
US Environmental Protection Agency
